

Rapid Operational Procurement Portal

with SAP BTP and Work Zone

Build supply chain resilience by bringing all purchasing, receipt, invoicing and inventory management activities for goods and services into a streamlined workflow.

- **30-50% cost savings in the areas of productivity, training, data quality and solution accuracy with an end-to-end digital experience using guided processes and Fiori apps resulting in 100's of users transitioned in 3 weeks with little to no training**
- **> 75% reduction in administration efforts, the number of process steps, and the average touch time**
- **7X Efficiency gains with requisition approval times**

Operational procurement solutions from ConvergentIS make it easy for users inside and outside your organization to purchase and receive goods and services and measure progress against POs.

This cloud-based BTP and Work Zone portal provisioned with out-of-the-box applications from ConvergentIS provides rapid, secure access to businesses and their suppliers to collaborate on core procurement and supply chain processes in real-time and view their data in an aggregated and user-friendly environment.

Benefits

- **Consumer-grade guided buying process** increases user adoption and efficiency, eliminates errors, and reduces non-compliance and maverick spend while enabling touchless operations.
- **Automated, centralized data population into your ERP** means less duplication and human error, and better visibility into spend and supplier data to perform analysis and forecasting.
