Convergentis

Rapid Services Procurement Portal
with SAP BTP and Work Zone

Achieve a unified view of your services spend, including services invoicing, SOW services, and contingent labour.
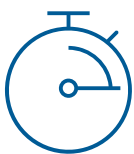

• **6X faster time entry**

• **7X reduction in paperwork through automation, electronic submissions and approvals**

Services procurement solutions from ConvergentIS are designed to cover end-to-end processes from all outsourcing activities and help you take the requisitioning process for people-based services from tactical to strategic.

This cloud-based BTP and Work Zone portal provisioned with out-of-the-box applications from ConvergentIS provides rapid, secure access to businesses and their suppliers to collaborate on core procurement and supply chain processes in real-time and view their data in an aggregated and user-friendly environment.

Benefits

• **Real-time insights** into agreed-upon prices, scope, and deliverables.

• **Service providers input time directly into SAP** when and where the service was completed.

• **Full visibility into total services spend**, resource allocation, and progress against each contract

• **Increase processing speed** and ensure on-time payment through touchless operations.

Rapid Implementation & Onboarding

Available Anytime, Anywhere

Financial-Grade Security

Real-Time Two-Way Communication

Single View into Multiple Business Systems

Highly User-Friendly

ConvergentIS
