Convergentis

We are an SAP Design, Build, Sell and Service partner providing services to clients across North America and we are leading by example by running S/4. This enabled us to implement and SAP Analytics Cloud, quickly and easily.

Our focus is on the Enterprise User Experience and we are leaders in SAP Analytics Cloud, SAP Fiori, SAP Cloud Platform, SAP Mobility and SAP S/4HANA.

We believe in:

- Providing beautifully simple solutions to complex business problems

- The enterprise user experience

- Increasing business clarity, velocity and margin

- **Buying versus Building**

- **Leading by example – we don't just implement S/4, we run it ourselves**
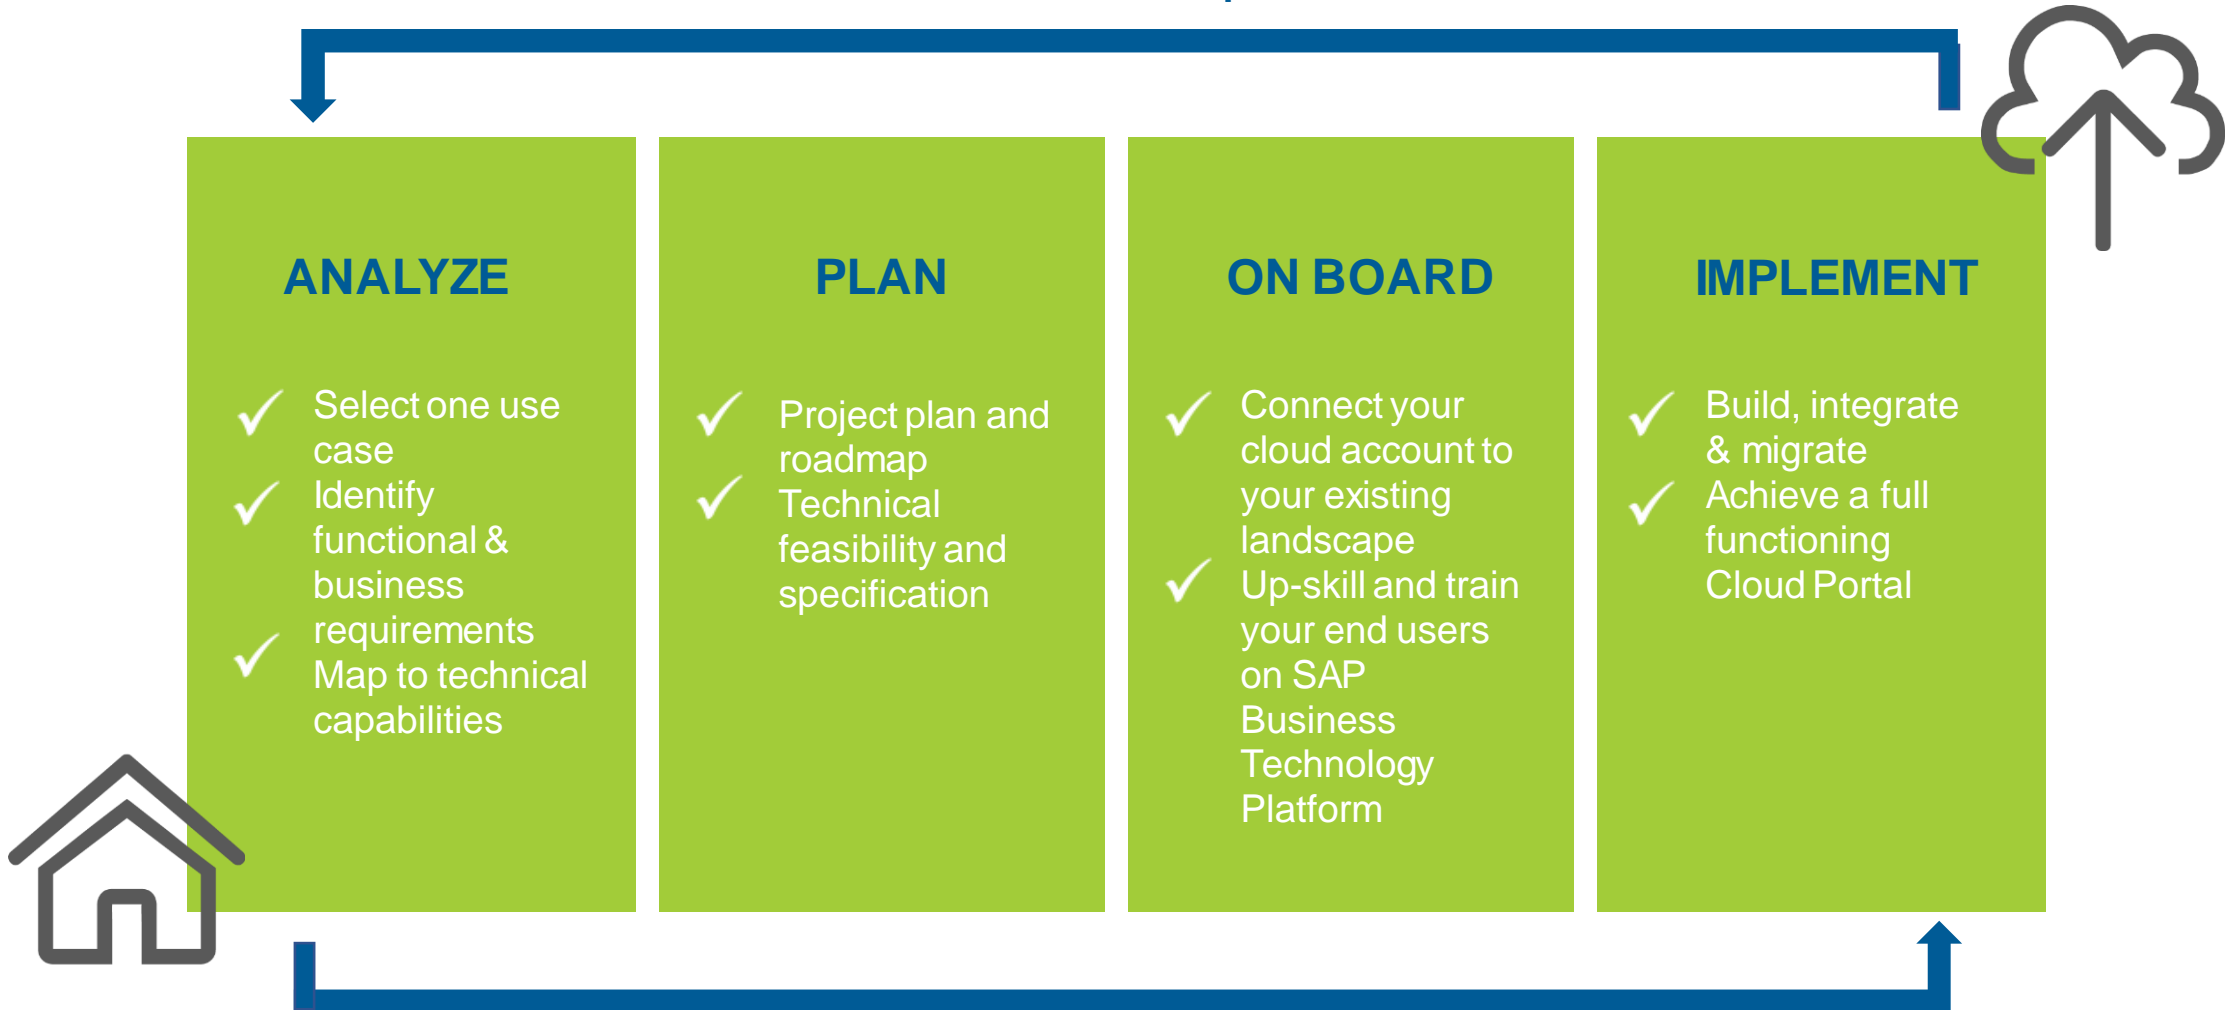

About Our Partner Package Offering

On-premise solutions require expensive infrastructure, time-consuming maintenance programs and high licensing fees, making a shift to the cloud an appealing option. But how do you translate complicated back-end infrastructure for all of your SAP and non-SAP solutions seamlessly to the cloud without degradation and downtime?

With the ConvergentIS **Qualified Partner Packaged Solution for SAP Business Technology Platform**, any business can enjoy the benefits of an on-premise solution within a cloud environment for as little as $4.00/user/month.

Transition from SAP Enterprise Portal to SAP BTP – How can we help?

After completing this process for one use case, this can be duplicated for many use cases in an iterative process.

ANALYZE

- ✓ Select one use case
